SOURCE

1. The Office of the Surgeon General, War Department, Washington, has information throwing additional light on the data reported in SO-5123, CIG 76803, distributed 19 May 1947. His Office has therefore furnished the following comments, which are herewith reproduced for the information and use of CIG and the NIA intelligence agencies:

- a. Paragraph 1. The statement concerning the division of the Soviet Ministry of Public Health is incomplete. Some of the main divisions, such as the State Sanitary Inspection, have not been mentioned. The Washington Comment on the change in administration is correct. (A brief report on health and sanitation in the USSR will be found in the Strategic Intelligence Digest--USSR, Chapter 2, Sociological, 3 September 1946, Secret).
- b. Paragraph 2. It would be more nearly correct to state that each republic has a similar ministry.
- c. Paragraph 3. Approximately correct. Deviations are minor and unimportant.
- d. Paragraph 4. Only major plants and factories have their own physicians. The remainder of the paragraph is approximately correct.
- e. Paragraph 5. Correct.
- f. Paragraph 6. Correct. It should be added, however, that the incapacitated workers receive 25% to 75% not of their usual wages but of the average wages they earned within the 3 months just prior to becoming incapacitated. The distinction is important in view of the piece-work remuneration prevalent in industry and agriculture.
- g. Paragraph 7. While it is true that all medical supplies are free of charge, it should be noted that, because of the scarcity of such supplies, only a selected group of workers have priorities to obtain them. The priority holders are, first, winners in labor competition, i.e., those who have produced the greatest amount of goods per time unit, and second, members of trade unions.
- h. Paragraph 8. Correct.
